

Cavern access with B field

- In December we have repeated the field map with L3 ON (we will confirm these measurements when also the Dipole will be turned on):
 - $B > 200\text{mT}$** (inside magnets + PMD) \rightarrow no access
 - $10\text{mT} < B < 200\text{mT}$** (rest of the cavern, except A-side) \rightarrow access ok (no visits)
 - $B < 10\text{mT}$** (A-side) \rightarrow access ok also for visitors
